THIS IS UNEVALUATED INFORMATION

25X1

1. There was no plant in ORSK (58°35'E/51°12'N), Chkalov Oblast, which was in any way connected with the production of V-weapons.
2. The production of solid fuels could have been done only in the ammunition factory; but only 20 and 37 mm caliber ammunition was seen there.
3. No rumors.

25X1

Comment:

a. According to two unconfirmed reports dating from 1946 and 1947, the WILNER NEUSTADT aircraft plant was transferred to ORSK in the southern Ural district. This plant allegedly produced jet fighters. Rumors that a large plant for the production of V-weapons was located in ORSK were even more frequent.

b. Although the question of the existence of an aircraft plant in ORSK and of the observation of jet fighters there was not mentioned in this report, the rumors on an alleged production of V-weapons there can now be considered as unfounded.

c. [REDACTED] confirmed the statements in paras 1 through 3.
